Product Overview

The **nFalcon-M** (nano Falcon M) is an ultra-compact, high performance, service demarcation device, delivering high end Ethernet services.

This product extensively supports the evolving needs for broadband access services delivery, including high throughput, granular SLA enforcement and monitoring, flexible management capabilities, and a high degree of scalability and flexibility to cater for future requirements and technology trends.

Support for 2.5GE allows an intermediate step for high speed access (>1G) while avoiding the costs of 10G, as required in applications such as Wifi access points (802.11ac Wave 2).

The **nFalcon-M** primarily addresses the rapidly-expanding market of business Ethernet access applications.

DS7130R0617

The **nFalcon-M** series is equipped with 2 x triple-rate SFP ports (100/1000/2500BaseX) and 2 x tri-speed Copper ports (10/100/1000BaseT). All ports can operate at full wire speed, with a total processing capacity of 14Gbps (non-blocking).

The **nFalcon-M** offers advanced Quality of Service (QoS) features including classification and mapping based on layer 1 through layer 4 attributes, rate limiting per service, with highly flexible scheduling, queuing and shaping options (including HQoS).

All MEF defined services (EPL, EVPL, ELAN, etc) can be configured on the **nFalcon-M** series and can also be protected through use of high performance mechanisms, based on G.8031, G.8032, etc., for link, path, and ring resilience.

These features make the **nFalcon-M** highly comprehensive package that can handle virtually any network topology and type of service.

The system implements current OAM standards (802.3ah, 802.1ag, Y.1731with HW assist as well as proactive measurements and alarming facilities.

To complete the OAM toolset, the **nFalcon-M** has a built in packet generator and analyzer to implement RFC2544/Y.1564 for quick service turn-up and verification. The **nFalcon-M** series is MEF CE2.0 compliant.

The **nFalcon-M** is housed in an ultra-compact housing, implements a fan-less design, and has an integrated internal, wide range AC or DC power supply.
